

Motivational Interviewing Training

Motivational interviewing is a conversation style that is useful for clients that present with ambivalence around behaviour change. Sometimes clients tell us their goal is to do or be something different, yet their behaviour stays the same (e.g., alcohol misuse, drug misuse, diet, exercise, procrastination). A motivational interviewing approach avoids argument, resistance or defensiveness and can be integrated into your current style of having conversations with clients.

Day 1: Introduction to MI – Thursday 6th July 2017
